

ARE YOU CONCERNED THAT YOUR WASTE, WHEN MANAGED WRONGLY, CAN AFFECT OUR ENVIRONMENT, OUR HEALTH & OUR SOCIETY?

Waste management is a complex system of multiple partners working collaboratively to ensure recovery of resources throughout the supply chain. You deserve the right partner to manage your waste responsibly.

We understand what today's conscious citizen cares about

Environmental Compliance - full compliance with all the current regulations:

Solid Waste Management Rules, 2016 (As amended from time to time)

Plastic Waste Management Rules, 2016 (As amended from time to time)

E-Waste Plastic Waste Management Rules, 2022

Bio-medical Waste Management Rules, 2016

Construction and Demolition Waste Management Rules, 2016

ACCOUNTABILITY THROUGH TRACEABILITY

Where and how does your waste get processed and resources recovered?

We offer traceability: full visibility of what happens to waste after it leaves your campus till it reaches the authorised end-destination.

ALIGNMENT TO YOUR SPECIFIC GOALS

Alignment with your Environmental, Social Governance (ESG), Sustainable Development Goals (SDGs), and Business Responsibility and Sustainability Reporting (BRSR).

SOCIAL IMPACT COMPLIANCE TO LABOUR LAWS

PUTTING PEOPLE & PLANET, ABOVE PROFITS

Saahas Zero Waste(SZW) is an IMS (ISO 9001, 14001 & 45001) certified social enterprise that offers holistic waste management solutions for tech parks, government departments, international organisations, bulk waste generators and consumers. We registered as a private limited company in 2013 and as a 'small industry' under the MSME regulations.

We work with nature, people and technology and believe that in the 21st century, businesses should put the well-being of our planet and all human beings above profits.

IMS certified (ISO 9001, 14001 & 45001)

OUR OFFERINGS

ZERO-WASTE PROGRAM AND MATERIALS RECOVERY FACILITY (MRF)

Decentralised waste management solutions with a holistic framework which aligns with ESG parameters.

Core service:

End-to-end, on-site and off-site waste management solutions for bulk waste generators. We offer composting and bio-CNG solutions for managing wet waste. The dry waste is sent to a MRF for further sorting, aggregation and dispatch to recyclers.

Value Added Services: -

95% waste diversion from landfill (Maximum Resource Recovery)

Advocating alternatives to Single Use Disposables

Waste Management Awareness & Training sessions for clients

Zero-Waste Certifications

On-site Standards assured on aspects of Processes & Safety. Monitoring through periodic internal audits and continuous staff training programs.

SZW has been operating an MRF for more than 6 years. This MRF continues to be a model for decentralised waste management. It combines the best practices of maximum resource recovery, social inclusion and an ethical supply chain.

It is a formal set-up located in an industrial zone and can process 10 tonnes of dry waste per day. We use digital tools like IoT and blockchain for MIS and traceability.

PLASTICS

Support to Producers, Importers and Brand Owners (PIBOs) for their compliance to Extended Producer Responsibility (EPR) regulations under the Plastic Management rules outlined by the Ministry of Environment, Forest and Climate Change (MoEFCC).

Core service: _____

Reverse logistics for recovery of plastic waste from the ecosystem.

Value Added Services:

Ethical supply chain through Social Inclusion (SI) model to ensure formalisation of the informal plastics supply chain

Using appropriate technology as an enabler to ensure traceability

Impact measurement

Public awareness

E-WASTE

Compliance to e-waste regulations under the E-waste Management Rules, and Battery Waste Management Rules outlined by the MoEFCC & Central Pollution Control Board(CPCB) for producers, importers, manufacturers, recyclers and refurbishers.

Core service:

Reverse logistics for recovery of e-waste from the ecosystem.

Value Added Services:

End-to-end EPR services -(EPR registrations and obtaining authorisations, preparation of EPR plan, implementation, audits & returns)

Refurbishment of electronic items through a dedicated facility for repair & extension of life of laptops, desktops, mobile phones and other Electronic & Electrical Equipment (EEE) categories under the E-Waste Management Rules, 2022

Ecosystem development

We partner with brands to drive awareness and collection systems

CIRCLE UP & CIRCULAR TEXTILE

With a focus on circularity, this vertical effectively extends the lifespan of low-value plastic, paper, and textile.

Core service:

Circle Up is committed to repurpose, up-cycle and recycle waste, and also promote and sell upcycled and recycled products from low-value plastics, paper, and textiles.

E.g. Ricron Panels Ltd, a GreenPro certified manufacturer of boards from Multi-Layer Packaging (MLP) Waste.

Our Circular Textile solutions for managing post-consumer textile waste include consulting services for research, development & one-of-its-kind Textile Recovery Facility. This facility has specialized infrastructure for identifying, sorting & aggregating post-consumer textile waste.

Value Added Services:

Social Inclusion to create an ethical supply chain for pre and post-consumer textile waste

Consulting services for research and product development of textile waste

Awareness and training for textile waste collection, sorting and product development

MIS and traceability

Customisable products

CONSULTANCY & ADVISORY PROCESSES

Consultancy and advisory services for understanding waste management challenges and designing projects that can be implemented in the Indian waste sector.

Core service:

Multi-disciplinary team of lawyers and environmental engineers with a diverse portfolio of projects. This ranges from policy driven work to baseline assessments, city action plans, knowledge products, compliance with EPR obligations and capacity building workshops.

Value Added Services:

Fast track solutions through our consulting services by using data and a decade of practical domain experience

Services for governments, international clients and development organisations

IMPACT THAT IS MEASURABLE & AUDITABLE

We do not just tick off boxes. We kickstart change which is measurable. Our detailed processes and MIS result in the following:

- Reduction in Greenhouse Gas (GHG) emissions
- Reduction in soil and water pollution
- Reduced consumption of energy and resources

DIGGING IN OUR HEELS AND ANCHORING PLANET AND PEOPLE

SZW believes that, in the 21st century, nature and by extension, planet Earth must be recognised as an important shareholder of any business. SZW's business model looks to bring alive a regenerative economy, where resources are put back and the benefits of the business are shared with stakeholders. And the company has been extremely fortunate that its investors, customers and workforce align with this commitment.
